ACKNOWLEDGEMENT

The completion of this research could not have been possible without the participation and assistance of so many people whose names may not all be enumerated. Their contributions are sincerely appreciated and gratefully acknowledged. However, I would like to express my deep appreciation and indebtedness particularly to Dr. Muhammed Yusuf, the supervisor of my research study for his endless support, kind and understanding spirit during my completion of this study. I would also like to thank to all the friends, colleagues, relatives and others who in one way or another shared their support, either morally, financially and physically to me. Lastly, I would also like to thank God for his unconditional guidance and wisdom as I complete my research.
